1 Getting started

This is an example course folder. Delete it once you've set up real ones, or keep it around as a reference for the conventions below.

Definition 1.0.1 (Example definition). This is what a `defn` environment looks like, defined in the shared `options.sty` one level up.

If you can see this, it works. This is my second change.

Proposition 1.0.2. *So is a prop.*

Remark And a remark.
